Department Of Computer Applications

Name of Program: Bachelor of Computer Applications

Sem V

Session: 2025-26(Winter 2025)

Title of Project: CLUETRAIL: THE 404 FILE

Abstract:

Description:

ClueTrail: The 404 File is an interactive web-based platform designed to engage users in exploring real-world unsolved crimes through a digital lens. The project creates a dynamic experience where users can dive into fragmented case files—photos, call records, timelines, maps, and public evidence—stored in a centralized database. The term "404 File" symbolizes the missing pieces in these unresolved cases, prompting users to investigate, connect clues, and uncover hidden patterns.

As unsolved mysteries continue to captivate public interest in today's digital age, this platform taps into that curiosity by allowing users to read detailed, podcast-style narratives, receive hints, and participate in discussions to collaboratively explore and attempt to solve cases. It encourages critical thinking, storytelling, and citizen-led investigation.

Language Used:

- Frontend: HTML, CSS, JAVASCRIPT
- Backend: Python ,java
- Database: SQL,MongoDB
- API: RESTAPI

Future Scope :

- **AI Clue Suggestions:** Use machine learning to suggest clue connections.
- **Podcast Mode:** Add voice narration for immersive case storytelling.
- **User Accounts:** Allow login, case progress tracking, and contributions.
- **Mobile App:** Develop an app for wider accessibility.
- **Real-Time Case Updates:** Collaborate with public crime databases.
- **Gamification:** Add points and badges to boost user engagement.

Name of Students:

- 1.Priti Pandey (GHRUA23011140631)
- 2.Diya Ambade (GHRUA23011140425)
- 3.Sonal Pandey (GHRUA23011140768)
4. Sakshi Mishra (GHRUA23011140692)
- 5.Shrawani Bhandarkar (GHRUA23011140746)
- 6.Anjali Singh (GHRUA23011140336)
